Anthony Browne was just four years old when he was separated from his family and sent to Australia on a child migrant ship. He was one of the last of thousands of children who were sent to Australia from Britain in the post-war era.

The child migrant scheme was set up by the British government in 1947 to help populate Australia and other Commonwealth countries. The scheme was promoted as a way for children to escape the poverty and deprivation of post-war Britain. However, many of the children who were sent to Australia were subjected to abuse and neglect.

Anthony Browne's experience was typical of many child migrants. He was sent to a Catholic orphanage in Western Australia, where he was subjected to physical and mental abuse. He was also forced to work on the orphanage farm, where he was often beaten and denied food.

Despite the challenges he faced, Anthony Browne eventually found happiness and success in Australia. He left the orphanage at the age of 16 and worked in a variety of jobs before starting his own business. He also married and had children.

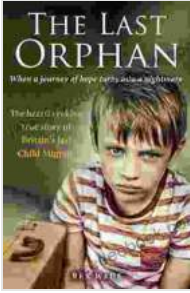

Anthony Browne's story is a reminder of the dark history of child migration. It is also a story of hope and resilience. Despite the challenges he faced, Anthony Browne was able to overcome his adversity and build a successful life for himself.
